Abstract (en)
[origin: WO0078637A1] The present invention provides a flexible cover (10) comprising at least one sheet of flexible sheet material assembled to form a semi-enclosed container having a periphery. The cover (10) is expandable in response to forces exerted by an article, item, or material over which the cover is placed to provide an increase in volume of the cover such that the cover accommodates the articles, items, or material placed therein.
