Abstract (en)
[origin: DE19928325A1] Bottle (1) filling plant comprises a blow moulding device (2) for producing the bottles from thermoplastic, a bottle washing machine (3), a filling machine (4) and a conveyor (5) for transferring bottles between the washing and filling machines, which can be synchronised. The novel feature is that the blow moulder can be synchronised in its operation with the washing machine and the blow moulded bottles are transferred to it by a series of conveyors (6, 7, 8).
