Abstract (en)

[origin: EP1188559A1] The device comprises several finishing units (9, 11) set side by side on slide carriages (91, 101, 111) which are mounted movable separately on a common cross bar (71) wherein at least one finishing unit is provided per slide carriage. The finishing units are associated with the plate cylinder of the printer and are movable axially relative to same. During printing the finishing units can be parked either side in areas close to the side walls (6).
