Abstract (en)

[origin: EP1188682A2] The sales pack has a support part (1) and a box-like socket (2) fixed thereon. The support part has a tear-off tab (3) in the area of the socket which after the pack has been opened can be folded back to close up the pack again. The tab is locked by pushing a foldable region of the tab back into the socket space where it becomes jammed.
