Abstract (en)

[origin: EP1188983A2] The support has a plate shaped base section which in first end region has a support foot system and in an opposite end region has a U shaped cut-out. The locating support is designed so that the first tongue has a snap element, which is elastically resilient in the direction to the supporting foot system. The support element is a locating projection (23). The light fitting (1) especially with integrated lamp has a housing (2), a preferably elongated lamp (6), which is held in at least one holder (5), a light influencing element (7) held detachable in a plug connection.
