Abstract (en)
[origin: WO0076541A1] The present invention relates to synergistic immunogenic combinations containing two or more pneumococcal surface proteins, including PspA and/or PspC and/or PsaA, advantageously, PspA and PsaA. Also provided are methods of intranasal administration of such immunogenic combinations to reduce nasopharyngeal carriage of pneumococci and methods of use of such immunogenic combinations in the prevention and treatment of <i>S.pneumoniae infection</i>.
