Abstract (en)

[origin: FR2794711A1] The invention concerns a vehicle opening panel (1) linked to said vehicle structure by coupling means (38) and comprising an external panel (2) and an external panel lining (3), located opposite the external panel (2). The invention is characterised in that the lining (3) comprises a protuberance (8), raised on the side of the lining (3) opposite the external panel (2), adapted to support at least part of said coupling elements (32).
