Abstract (en)

[origin: DE19921326C1] The drainage channel when the door (2) is locked runs behind the outer panelling (6) of the door in a dead space (11) between the upper edge of the door and a frame (4) guided above the door opening. The profiled channel can be fixed on a frame panel (5) and is movable between a locking position under the contour of the outer wall when the door is locked and an unlocking position when the door is opened.
