Abstract (en)
[origin: EP1190662A1] On the underside of the vacuum cleaner a sliding sole (7) is provided with a suction opening (13) which links with the suction duct (2) through a connection stub (14). The sole is supported on the curved bearing surface (18) of the stub and pivots about snap-in connectors in the walls of the stub. The plastic housing (1) and the sole are single piece mouldings fitted with all components necessary to form this pivoting linkage.
