Abstract (en)

[origin: EP1191145A1] The cement injector for railway line bedding has a chassis (23) carrying a mixer (29) with a feed container (31) and middle draw chests (37) between the support points (15) of the left and right rails (17,18). Two outer draw chests (38,39) are mounted over the outer area (43,44) before the heads of the support points. A cement pump (32) has a mix distributing feed (33) in the middle chests and outer chests.
