Abstract (en)  
The lavatory bowl is raised between a normal height level and at least one more higher level, by an electrical, hydraulic, pneumatic drive. The bowl is fastened directly to a lifting device, pref. via e.g. hooks of the device, which pass through apertures in the bowl. Alternatively, the bowl is supported on a height-adjustable element, e.g. a plate, a surrounding container, ring, or clamp device. The lifting device has two flexible connection hoses or telescopic tubes, fastened to the bowl and to a flushing water cistern and waste outlet.

Abstract (de)  
Die erfindungsgemässe Hebevorrichtung ermöglicht dem in Stehposition urinierenden Mann auf einfachste Art und Weise die unangenehmen Spritzer zu vermeiden indem die Toilette mit der Hebevorrichtung vor dem Urinieren aus ihrer Normalhöhe angehoben wird. <IMAGE>
