Abstract (en)

[origin: EP1191162A2] To erect a suspended ceiling held by grooves and mountings, one or more boards (P) have two profiles (1) which are fitted rigidly to holding profiles (3) with height adjustment, but which can be detached. At an interval of a board width, further boards are assembled with their locking profiles. A board is inserted into the gap, suspended by its fitted profile (3) against the neighboring fixed boards.
