Abstract (en)
Filter connector comprising a contact (1) provided with its own filter (6) such that the filter is held around an intermediate portion (5) of the contact by means of a spring (14) compressed between a sleeve (13) resting against an end (17) of the filter and an adapter element (15) mounted at a rear end (4) of the contact. The filter is also held around this intermediate portion by a shoulder (8) of the contact. The adapter element is used to receive a cable. The filter mounted around this contact may be a capacitive filter or else a Pi (pi) filter. <IMAGE>
