Abstract (en)
[origin: DE19928009A1] A motor vehicle drives in front of a petrol pump and stops, so that there are one or more barriers (7a,7b) between the front and rear axles. A vehicle's approach is passed on by induction loops (2a,2b) as a signal to a control unit (5) for receiving a signal (1) from a petrol pump (9) after taking the first amount of petrol.
