Abstract (en)
[origin: WO0063611A1] The invention concerns a container (1) in particular a container made of composite material, and having a cylindrical side wall (1a) and round-shaped ends (1b), commonly called domes . The device (2) comprises a shell (10) made of a puncture-resistant material, shaped to enclose at least the container (1) dome assembly (1b), by delimiting a space between its inner surface and the outer surface of the container (1); and a compressible material (11) for absorbing shock or impact, filling entirely said space.
