Abstract (en)

[origin: GB2351565A] The apparatus comprises a conveyor having an open mesh endless belt 12 for transporting arriving aerosol containers 8, through a heating station 2. The heating station 2 comprises an array of shower heads 22 which rain heated water down onto the containers 8 carried by the conveyor until the temperature of the container 8 and their contents are substantially stabilised at a predetermined level. Thereafter, the conveyor carries the containers 8 through a drying station 4 where they are subjected to blow drying.
