Abstract (en)

[origin: WO0126082A1] Apparatus for displaying images, in particular but not exclusively advertisement images, said apparatus being provided with a semi permeable mirror of which the reflecting side is directed towards the spectator, projection means via which an image can be projected onto the rear side of the mirror, a casing executed such that when the projection means are engaged the spectator sees the projected image and when the projection means are not engaged the spectator sees his own mirror image, control means via which the projection means are controlled in order to project a series of images. The apparatus is further provided with a connection to a telecommunications network via which network the control means can receive instructions that can influence the sequence of the exhibited images.
