Abstract (en)

[origin: FR2813584A1] The packaging case made from a pre-cut blank comprises a peripheral casing with hinged panels, a top panel (13) and a bottom panel (14). The extension (20) of the packaging case bottom comprises, successively from the hinged panel, a first band (22) adjacent to the hinged panel, three median bands (23,24,25) separated by folding lines which after folding are glued against each other to form a triple thickness support rib. Following the last median band is an end band (30) extended by a hinged panel fixing band.
