Abstract (en)

[origin: EP1193452A1] The electronic control card (3) is situated at the junction of a first channel (1) which contains gas valves (4) and a second channel (2) which is preferably at right angles to the first. Air enters the first channel through orifices (11) and flows past the gas valves to cool the electronic card before being extracted by a vertical ventilator with deflector (14) located in the second channel
