Abstract (en)
[origin: WO0145544A2] Vacuum cleaner for industrial and domestic applications, in which the sucked up dust is collected in a vessel filled with water. The necessary sucking action is generated with an air pump or with a venturi, located in a suction tube in front of the vessel. In order to realize complete washing out of the dust, the vessel is provided with at least one grid through which the air bubbles can escape.
