Abstract (en)
[origin: WO0103726A1] The present invention relates to a pharmaceutical composition comprising Factor VIII and the divalent metal ions Zn²⁺ and Cu²⁺, optionally in the presence of Ca²⁺ ions and/or Mn²⁺ ions, wherein said Factor VIII is stable without the addition of albumin. The invention also relates to a method for the production of recombinant Factor VIII from mammalian cells carrying the gene therefor, comprising culturing said mammalian cells in medium free of plasma-derived protein and supplemented with divalent metal ions, including Cu²⁺ and Zn²⁺, and optionally in the presence of Ca²⁺ and Mn²⁺ ions.
