Abstract (en)
[origin: WO0076864A1] Article display and dispenser, in the form of a package manufactured from a sheet material, which is adequately folded along fold lines, in order to define a parallelepipedic box, comprising, when the box is in a lying position, a larger upper wall (10) which is articulated, through a rear fold line (12), to a smaller rear wall (20) and, through a front fold line (11) to a retaining flap (13), said larger upper wall (10) having a front portion and a rear portion, which are separated by a median fold line (14), having a region interrupted by a cut (15), which is usually "U" shaped and provided at the rear portion of the larger upper wall (10) and wherefrom it may be easily detached, in order to be incorporated only to the front portion of said larger upper wall (10), said box further having, to be used in a suspended vertical condition, a dispensing window (48) and a suspension flap (26) provided with a fixing means (27).
