Abstract (en)
[origin: US6448212B1] The invention relates to a laundry/dishwasher detergent portion, more particularly for use in a washing/dishwashing machine for a program taking place in an aqueous phase, containing(a) a first measured quantity of a washing preparation which passes into the aqueous phase at a temperature below or equal to a first temperature;(b) a second measured quantity of a washing preparation which passes into the aqueous phase at a temperature below or equal to a second temperature which is above the first temperature;(c) at least one material which surrounds at least one of the measured quantities of a washing preparation and which dissolves in water at a certain temperature. The invention also relates to a process for the production of such a laundry/dishwasher detergent portion and to a washing process and a cleaning process using the laundry/dishwasher detergent portion.
