Abstract (en)

[origin: WO0057119A1] Heat treatment for drying and killing of parasites etc. of wood, including semi-manufactured wood products, or wrapped material, as bags and bales, is done with microwaves. Small units with low power demand are used. New electric installations or other measures for ensuring energy supply are usually not required. The method comprises mutual mobility between microwave generators (2) and the material (1) to be treated.
