Abstract (en)
[origin: EP1195181A1] The fastening consists of a base (4) and a pivoted rear support (10) with a vertically adjustable plastic or metal reinforcing element (22) in the form of an separate component with a length greater than its width and greater than half the height of the central portion (19) of the support. The reinforcing element is adjusted and fixed in place by a system of nuts and bolts inserted through elongated slots, with toothed surfaces to set it in the required position.
