Abstract (en)

A pawl with corresponding fixed coupler for a closure of the cremonebolt type for doors of trucks or the like, in which the pawl has two elongated prongs on one side of the rotation axis and, on the other side, two heels adapted to mate respectively with a mushroom-shaped part and with a lug (12), which protrude from the coupler, the prongs being slightly arc-shaped and the point of contact between the pawl and the fixed coupler being very close to the rotation axis of the pawl. <IMAGE>
