Abstract (en)

[origin: EP1195561A2] The system has two or more heat exchangers (1,2,3), connected to the boiler, with cold water inlet valves (10a,20a,30a) and hot water outlet pipes (12,22,32). When the demand is too high for a single outlet (22) a control unit (60) switches in another heat exchanger.
