Abstract (en)
Microwave absorber wall (1) comprising a metal wall (3) onto which a plurality of absorber elements (2, 2') are mounted, each of these elements having a base (6, 6') facing the metal wall (3), wherein the bases (6) of a first number of absorber elements (2) are located in a first plane (alpha) and that the bases (6') of a second number of absorber elements (2') are located in a second plane (beta) parallel to the first plane (alpha), the first plane (alpha) being shifted in height direction of the absorber elements (2, 2') with respect to the second plane (beta), the second plane (beta) being further from the metal wall (3) than the first plane (alpha). <IMAGE>
