Abstract (en)

A modular telecommunication plug and a method of coupling a cable with twisted wire pairs to the same. The plug comprises a housing with a wire receivable cavity (1) adapted for guiding bared untwisted ends of the cable wires towards a plug contact end which is provided with grooves (5). The grooves are adapted for receiving straightened bared ends (8) of the wires that will constitute the contact terminals of the plug. In a preferred embodiment, the housing has a fixed part (9) and a removable part (10). The fixed part has the upper wall (3) of the plug housing cavity (1) and the removable part has the lower wall (2) of this cavity, the untwisted wire ends being maintained between these two walls. <IMAGE>
