Abstract (en)
[origin: WO0078411A1] An indicator for golf players comprises a portable unit (1) which includes a GPS navigator or some corresponding position indicating device adapted to determine the geographical position of a given place and to store this position in a memory. The indicator includes a display (2) on which the golf course concerned and parts thereof can be shown, and also includes a data input device (3) for entering information, such as positional information, choice of club, number of strokes, etc., to be entered into the portable unit. The invention is characterised in that the portable unit (1) includes a display (2) that can receive pointer information, so that the user is able to point to the display whilst the course or a part thereof is shown thereon, so as to enter into said memory a geographic position that corresponds to the position pointed out on said display.
