Abstract (en)

[origin: WO0105529A1] The invention relates to a method and a device for rolling a metal strip, using a sizing stand (7). The thickness of the metal strip (1) is reduced by the rolling process in the sizing stand (7), whereby the speed of the metal strip (1) as it is fed into the sizing stand (7) and the speed of the metal strip (1) as it leaves the sizing stand (7) are adjusted independently of the traction on the metal strip (1).
