Abstract (en)
[origin: WO0066981A1] A fluid dispenser (10) for administering fixed or adjustable doses in injectable applications comprises: a connection member (10) connected to a fluid source (26); body member (20); a dose cylinder (32), a connection member (18); a piston member (22) and spring (66) biased in an extended position; a trigger member (24). The dispenser may include an automatic venting feature (78) to assist the flow and to prevent contaminants from being suctioned back into the container; a guide positioned on the connection member (18); a seal chamber (26) mounted on the connection member. The sealed chamber (250) has a first tip (252), a second tip (254), and a movable seal (256). Both of the tips are adapted to be connected with communication channel (30) and with a fluid source. The dispenser may include a mechanism (15) for dispensing measured doses, a protective cap (162), insulation and padding (170).
