Abstract (en)
[origin: EP1197319A1] Key comprises an upper guide part containing a sliding element (20) and a sliding guide element (10) held together by at least one guide clip (30) and a lower guide part containing a driving element. An Independent claim is also included for a method for reproducible adjustment of a key in a tool. Preferred Features: At least one guide clip connects the sliding element and the sliding guide element. The guide clip engages in a form-locking manner in the sliding guide element and/or the sliding element.
