Abstract (en)
[origin: EP1197615A2] This invention relates to a cradle (10) for a building structure (11), the cradle (10) comprising a workstation (12), means (13) for moving the workstation, at least one attachment member (14) capable of attaching the workstation (12) to at least one substantially vertical track (16) and at least one guide member (18) capable of guiding the workstation (17) relative to at least one substantially vertical track (16) when the workstation (12) is moved. The invention also relates to a cradle system, a method of maintaining or carrying out remedial work on a building structure and a building having a cradle system. <IMAGE>
