Abstract (en)
[origin: WO0108190A1] The invention relates to a fuse combination unit (1), comprising a housing (2) and an operating rocker (30) which is mounted in the housing (2) of the fuse combination unit (1) and can be pivoted back and forth between an on-position and an off-position. The fuse combination unit (1) comprises devices (70, 71, 72, 73) used in a monitoring circuit and a display (35) for monitoring the operational capacity of a fuse cartridge (20), whereby the display (35) is located in the operating rocker (30). The display (35) is preferably an optical display.
