Abstract (en)

[origin: WO0108236A1] Methods for preparing thick film rare-earth $\text{Ba}_{2-x}\text{Cu}_{3-x}\text{O}_{7-\delta}$ (such as YBCO) superconductive layers, particularly including deposition of a precursor as a dispersion of solid-state materials, including a binder or a solvent or both constituents. The solid-state materials include oxides, fluorides, and acetates of yttrium, barium, and copper in the form of ultrafine particles.
