Abstract (en)

[origin: WO0074171A1] An antenna device (1) for mounting into a piece of mobile telecommunication equipment (12) is distinguished by connecting means being connecting pin elements (5) having a point-shaped free end (7). Each pin element (5) is provided on a resilient portion (4;13) of or in connection with the antenna element (2) so as to allow longitudinal flexing of each pin element (5). The invention also concerns a piece of telecommunication equipment including such an antenna device.
