Abstract (en)
[origin: EP1199019A1] The bathtub or shower tray is provided outside on its bottom zone with a reinforcing layer (3) which consists of a flat plate (4) with ribs (5) on its side facing away from the bathtub. These ribs divide the reinforcing layer into compartments (6) which are provided with holes (7), and are filled at least partially with the bathtub or shower tray material. Also claimed are an application of the proposed reinforcing layer for production of a reinforced bottom zone of a bathtub or a shower tray, and a method for producing such a bathtub.
