Abstract (en)

[origin: EP1199779A1] There is an electric connector (140) for a whole electric equipment to bring it back in a conveyor. There is a front and rear functional parts located in metallic blades for an electric connection. There is a bearing (141,142) holding at least one connection blade (150). On the side of the bearing there is at least one metallic contact (151), which is inserted in the rear part of the equipment via an orifice located in its deep wall in order to connect it with the metallic blade.
