Abstract (en)
[origin: WO0100713A1] The invention relates to dry polymer pigments, particularly to plastic pigments applicable in dry form that may be used in a dry coating method of paper and board, and to a method for producing polymer pigments applicable in dry form. The plastic polymer pigment applicable in dry form comprises plastic pigment particles wherein the size of individual particles is from 10 to 2000 nm, the dry matter content of the plastic polymer pigment being from 85 to 100 wt% of the polymer pigment, and the individual plastic pigment particles form agglomerates having a size from 1 to 500 μ m.
