Abstract (en)
[origin: WO0106048A1] The invention relates to a method for producing blended yarns. In a first sub-process (P1), an untreated yarn is spun and pre-drawn from synthetic fibres in a spinning machine at a first production speed (V1). In a second sub-process (P2), said untreated yarn is subsequently textured in a texturing machine at a second production speed (V2). Finally, in a third sub-process (P3), the textured yarn is entangled together with an elastic filament in a vortex machine at a third production speed (V3), to produce the end product. In said method, the second production speed (V2) of the second sub-process (P2) is adapted either to the first production speed (V1) of the first sub-process (P1), or to the third production speed (V3) of the third sub-process.
