Abstract (en)

[origin: FR2796513A1] The invention concerns a device for interactive and smooth direction control in a compressed digital film. It comprises a computer (1) equipped with a sound output (2), and a video output (3), both connected to a display system (4), and an input (5) connected in series to means for controlling the direction (6) with means for controlling the speed (7) of the motion of the film. The computer (1) comprises a software for managing said device. The invention is useful for interactive presentation of a film concerning travel, an apartment, demonstration of an equipment and the like.
