Abstract (en)
The present invention relates to a device for the high-pressure sterilization of packaged foodstuffs, in particular bottled drinks, a high-pressure sterilization process and an apparatus for carrying out this process. More specifically, the present invention relates to a pressurization device (1) comprising a jacket (4) with a closure (3) and containing a pressurization chamber (18), the said pressurization chamber (18) being connected to pressurization means (47, 48), the said pressurization device (1) being characterized in that the said closure (3) is located at the top of the device for the top loading of an object that is to be pressurized. <IMAGE>
