Abstract (en)
[origin: EP1201148A1] Holes (20) in the watch casing bracelet shoulders (16) are coaxial (A-A) and screw holes (24) in the metal bracelet end blocks (22) have axes (B-B) which form an angle (α) with the axis (A-A). The screws (26) have a first slotted end (26a) and a second conical shaped end (26b) whose summit angle is twice that of the angle (α). The blocks (22) are made from the same material as the bracelet. Assembly comprising a watch casing (10) and a bracelet (12), in which the casing has a pair of shoulders (16) to which the bracelet is fitted, and which each have a hole (20) designed to receive the fixings which attach the bracelet to the casing. The assembly includes: (a) two metal blocks (20) fixed to the bracelet, fitted in the space (18) between the two shoulders (16), each having a screw hole (24), and; two screws (28), each engaged in one of the screw holes and into the hole (20) of the adjacent shoulder.
