Abstract (en)

[origin: FR2814721A1] The palletized crate has tubular uprights (3) which fold down on to the base and mesh walls (4') which fold down with them. Each upright has a locking pin (5) attached to a slide (6) mounted inside it. This cooperates with a locking plate (7) attached to the base (2). A latch (8) mounted on the wall moves the slide and releases the pin from the plate.
