## Abstract (en)

The assembly (1) consists of a first compartment (2) for the product (P), a second compartment (5) communicating with the first by an aperture (18), and a non-soluble applicator (7) attached to a cap (8) on the open end of the second compartment. The free end of the applicator presses against a plug (16) of a porous and compressible elastic material, located over the aperture. The assembly (1) consists of a first compartment (2) for the product (P), a second compartment (5) communicating with the first by an aperture (18), and a non-soluble applicator (7) attached to a cap (8) on the open end of the second compartment. The free end of the applicator presses against a plug (16) of a porous and compressible elastic material, such as a hydrophilic open or semi-open cellular foam, located over the aperture. Part of the applicator has a flock surface (9) of natural or synthetic fibres.

## Abstract (fr)

La présente demande concerne un ensemble (1) pour le conditionnement et l'application d'un produit (P), notamment cosmétique, ledit ensemble (1) délimitant un premier compartiment (2) contenant le produit, et un second compartiment (5), en communication avec le premier via au moins un orifice d'amenée (18), ledit second compartiment comportant une ouverture (11) obturée de manière amovible par un élément de fermeture (8), ledit second compartiment formant un logement pour un applicateur (7) non soluble au contact dudit produit, et qui, en position fermée de l'élément de fermeture, est en appui sur un organe poreux, élastiquement compressible (16), en communication avec ledit orifice d'amenée (18). <IMAGE>
