Abstract (en)  
[origin: EP1201840A2] The frameless partition elements (1) are connected together on the same floor level and each two adjoining elements are fixed free of floor and ceiling on transverse wall shaped supports (7) by means of holders made of the same material and construction as the partitions. The holders consist of support bolts passing through the support wall and L-angles (11) on both sides of the support wall and fixings on the two bolt sides. The support walls rest on bearings (8) fixed to the floor and having guide members for the lower end of the support wall. the partitions, support walls and sliding door can be made from glass, metal, aluminium, wood, plastics or similar .
