Abstract (en)
[origin: EP1201841A1] The upper part (3) of the U-shaped direct hanger (1) has a horizontal base plate (4) with two upwardly angled fixing arms (5) whose end sections (7) can be angled outwards horizontally whilst an inverted U-shaped anchor clip (10) has a horizontal web plate (12) with two downwardly angled arms (13) for hanging by side anchor projections (14) underneath the two oppositely aligned edge beads (15) of a C rail (2). The base plate of the upper part and the web plate of the anchor clip rest one on the other and are connected together to rotate through a vertical central rotational axis (11). The central rotational axis is formed through a connecting sleeve projecting through a central bore in the base plate and web plate.
