Abstract (en)

[origin: EP1201852A2] A bridge (4) joins the two housing parts (2,3), and is formed of an arm 6) next to the closure member (5). Two fastening-sections (7) protrude away from each other from the arm and fix the housing parts to the arm. The modular bridge consists of an arm and two fastening parts which plug into each other. The fastening part has an insertion end (8) fitting into an opening (9) in the arm.
