Abstract (en)

[origin: EP1201870A1] The bars or barred grilles are contained in a frame, especially a spreader frame (4) for double-glazing panes. A four-sided, right-angled mounting-frame tilting towards the vertical holds movably mounted cross-bars (2,2';3,3') containing the spreader-frames. The bars or grilles are fixed in the spreader-frame by means of an appliance (9-12). The mounting-frame consists of two parallel horizontal fixed frame bodies (5,6) joined at right angles by two parallel lengthwise bodies (7,8).
